

DRUPAL CLIENT PLUGIN

PHRASEANET CLIENT FOR DRUPAL

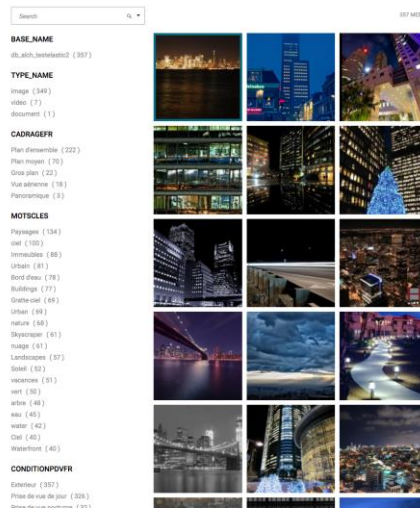

Alchemy offers a Client plugin for Drupal. This module allows the editor to display a Phraseanet block in an article or a page.

This block allows to search, display directly and download media files.

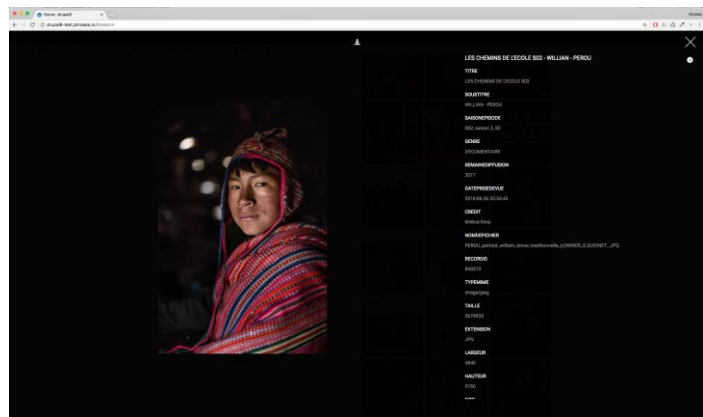

Compliant with Phraseanet 3.8 & 4.0

Many setup options to display the photo gallery:

- Display the photo gallery on all pages, articles, or page/article
- The Drupal site administrator can choose to restrict the content according to roles: the gallery can be viewed by all users, or to authenticated users, or to administrators only.

Display the content of your media gallery with all search options and the facets

Display of the detailed view of a media

URI and access	Collection ids
Settings	Set the collection ids to filter search
Features	Facet Collections
Subdefs	Set the collection to be used in your application
	Status
	Set the status to be subtract to the allowed records to be displayed. E.g. "status_name_2: 0, status_name_1: 1". This option doesn't work for Phraseanet 3.8
	Complex query
	Set the facets your user will use in plugin. Please, wrap field value in double quotation (" "). E.g. field.CADRAGEFR = "Plan moyen"
	<input type="checkbox"/> Activate search with Truncation (only use with Phraseanet V4.0 and upper)
	Records per page
	100
	Facets
	<input type="checkbox"/> Objets
	<input type="checkbox"/> Base_Name
	<input type="checkbox"/> Type_Name
	<input checked="" type="checkbox"/> CADRAGEFR
	<input type="checkbox"/> MotCles
	<input type="checkbox"/> Provinces
	<input type="checkbox"/> Pays
	<input type="checkbox"/> Source
	<input checked="" type="checkbox"/> ConditionPwrFr
	<input checked="" type="checkbox"/> Credit
	<input type="checkbox"/> Collection_Name
	<input type="checkbox"/> Ville
	<input type="button" value="Pull facets from phraseanet"/>

URI and access	List of allowed subdefs which will be used in plugin. If empty - only default one will be allowed. Example: "preview,thumbnail"
Settings	Images
	<input type="text" value="preview,thumbnail"/>
Features	Videos
	<input type="text" value="preview"/>
Subdefs	Documents
	<input type="text"/>
	Audio
	<input type="text"/>

Easy setup of the content you wish to display for your users
