

Open Source Digital Asset Management Solution A unique central system for your assets

Phraseanet allows you to capture, organize, index, distribute and preserve all your digital content (photos, videos and other documents) on an online, secure platform, available 24/7

All essential advantages of one of the leading DAM solutions :

Complete, Phraseanet is fully integrated within the enterprise, with several plugins available that allow interconnection with your daily applications.

Powerful, thanks to the powerful Elasticsearch engine: You find all your media files faster. A real time saver for the users and a better productivity.

Money saver : By centralizing media into a DAM, you make available a common base of resources that can be easily searched and shared. You avoid re-purchasing and re-producing. No more waste, we reuse!

Employees use the right files at the right sizes. You have a total control thanks to a fine management of user rights, but also of media. And you protect yourself from legal risks by guaranteeing their proper use.

ACQUISITION

Multiple acquisition methods

Simple Uploader

Advanced Uploader (pre-indexing, recovery in case of outage, offline mode from a smartphone...).

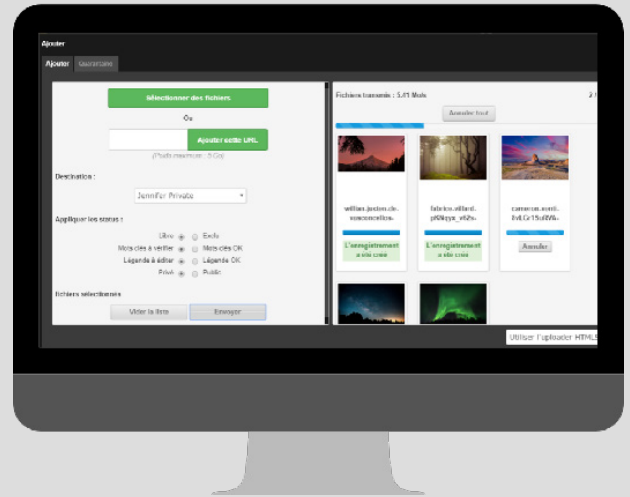

The media acquisition can also be done from drop folders, FTP or via the API.

Support of all standard photo formats

But also video, audio, PDF, Office, Indesign documents...

Management of duplicated and non-compliant files

A quarantine, which can be configured, sets aside the documents that do not comply with the prerequisites.

PROCESSING AND AUTOMATION

Read and write embedded metadata

IPTC, XMP, Dublin Core, Exif, ID3, MP3, PDF, Office, geolocation

Making sub resolutions customizable

Submission to Artificial Intelligence engines

Keywords, colors, personalities, subtitling

End of rights alerts

Automatic move of documents

SEARCH AND VIEW

Full text and thesaurus search engine

Intuitive search

Phraseanet relies on the powerful Elasticsearch engine. The user is guided in his search and navigates in a very intuitive way by creating filter associations.

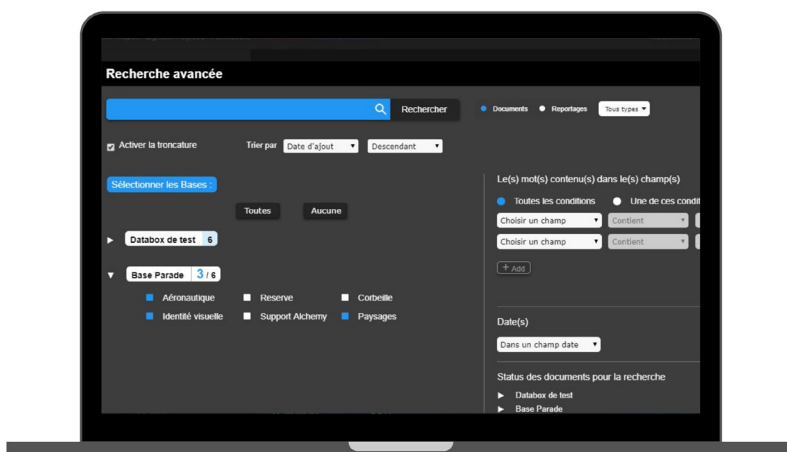

Geolocation search

Photos with geolocation information can be searched by selecting one or several areas on a map.

Viewing assets

View in thumbnail or list mode

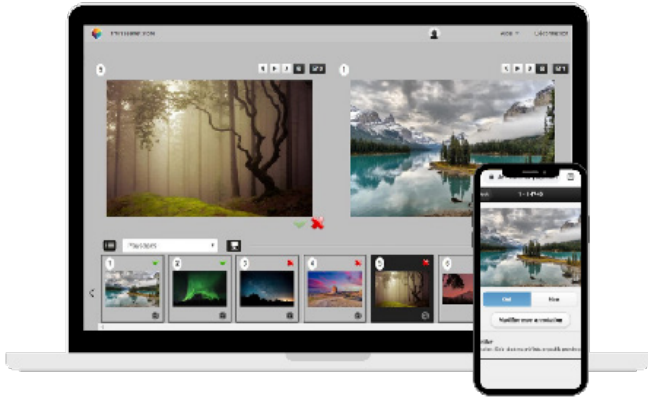

Detailed view with all related information: actions history, views, downloads

ACTIONS ON DOCUMENTS

Indexing

Batch and sub-batch indexing, via suggested value lists or the multilingual thesaurus
Indexing by stories

Export

Local download, email, FTP, orders.
Choice of sub-resolutions and records for export. Original document, preview, thumbnail, XML record, text record... and as many formats that have been setup.

Print

Contact sheets, thumbnail list, image with or without caption, feedback reports

Image and Video Tools

Images: Metadata, substitution, rotation...
Videos: Chaptering, subtitling...

Collaboration, share and publication Tools

Push (sending documents to recipients with the right to download or not).
Feedback (request an opinion on documents, with the right to see the choices made by others or not, to annotate documents, etc.).
Permalinks and share on social networks.

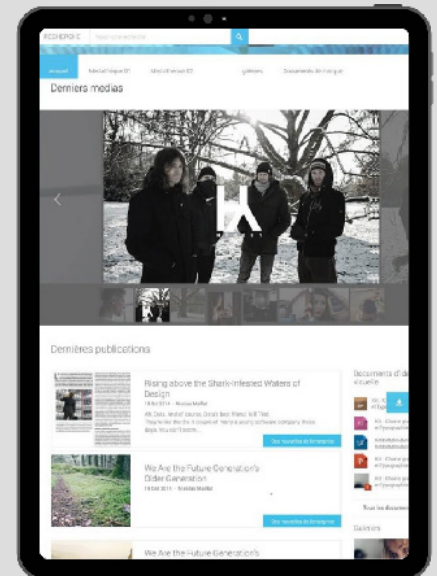

A CLIENT SITE USING YOUR GRAPHIC CHARTER WITH PARADE

With Parade, the DAM takes your colors and your graphic identity.

A simple integration (logos, colors, texts) from **PARADE Standard**.
Need a specific navigation?
Request **PARADE in Project mode** !

- **Responsive design**
- **Multi-protocol authentication.** External directories compatibility (SAML, OAuth2)
- Dynamic, customizable **Homepage**
- **Medialibrary** Search, filters and navigation with facets
- Thematic **Galleries**
- **News management** as articles
- **Visual identity management** Logos, templates, typefaces...

ADMINISTRATION

- Creation and management of database & collections
- Advanced management of user rights
- Creation of user templates
- Setup of the fields structure
- Management of multiple sub resolutions
- Writing and implementation of scripts for automatic processing of documents

- Watermarks management
- Registration requests management
- General Conditions of Use management

STATISTICS

- Export of database activity reports
- User connections reports
- Downloads reports
